6.BO.1 Introduction

This is a newly discovered family since the Jephcott book was published, so the only family tree is the gedcom tree, which can be viewed, with all the others from our website. It is only a small tree and one of those that comes from the cluster of Jeffcotes, Jeffcotts, etc that we commonly associate with Nuneaton, Hartshill, Stockingford, Chapel End, Hartshill, Ansley, etc. We have great difficulty sometimes with separating out who belongs with which branch of the family. This one stands alone, with us being unable to connect it with any other – at the moment.

This 1851 extract shows Thomas Jeffcote, aged 56, a ‘Coal Higgler’, born in Stockingford and recorded as being blind. His wife Mary was a ‘Hand Loom Ribbon Weaver’, a common profession in that area at the time.
